SKILLS

SQL & Database Administration | Linux system administration | Windows Server & Active Directory | Networking & Subnetting | Firewalls & Security | Docker (basic) | Automation & Scripting (PowerShell, Python, YAML) | Web development basics (HTML, CSS, JavaScript) | Version control (Git / GitHub) | Office tools (Word, Excel, PowerPoint, Office 365) | Network services (DNS, DHCP, FTP, etc.) | Problem solving & troubleshooting | Teamwork and collaboration | Time management & adaptability | Customer and user support | Knowledge of data protection regulations

PROJECTS

03/2025 – 07/2025

Hotel Management Application (Python & PostgreSQL)

Intermodular project integrating programming and database modules.

- Designed and implemented a **relational database** in PostgreSQL for managing a hotel chain.
- Developed a **Python-based application** to handle customers, bookings, check-in/check-out, staff, and billing.
- Integrated **external API (Mossos d'Esquadra)** for daily guest report automation.
- Created **Power BI dashboards** for visual analytics and business insights.
- Applied **data security measures** including SSL, data masking, and role-based access control.
- Configured **automated backups and high-availability replication** between nodes.
- Generated **dummy data** for performance testing and multilingual support (Cyrillic/Asian scripts).
- Managed task planning and progress tracking using **JIRA**, following Agile methodology (Scrum/Kanban).

02/2024 – 06/2024

TechSolutions IS – Final IT Infrastructure Project (Institut Sa Palomera)

Design and implementation of a complete corporate network environment.

- Planned and deployed a **multi-server infrastructure** (Ubuntu Server & Windows).
- Configured **Active Directory, LDAP, DHCP, DNS, Mail Server (Postfix), Web Server (Apache + WordPress + Moodle)**.
- Implemented **firewall (pfSense), RAID-5, and automated backups with Déjà Dup (Google Drive integration)**.
- Designed **logical and physical network topology** with **LAN/DMZ segmentation and SSL/TLS security**.
- Created **database system in MS Access** for incident tracking.
- Ensured **network monitoring, storage redundancy, and compliance with GDPR**.
- Delivered **full project documentation, presentation, budget, and promotional video**.
